**President's Message**

*By Tom Sell*

Here we are, already at the end of 2022. I've enjoyed the return of many industry activities and events this year. For the Sierra Chapter, that momentum will carry over into 2023 starting with our annual joint meeting with APWA on January 6. Be sure to get signed up before you're distracted by year-end deadlines and the holiday hustle & bustle.

On December 6th, I joined our Chapter VP, Erik Fanselau at the 2022 CREATE Awards Luncheon. I had the honor of representing ACEC while awarding a \$2,000 scholarship to a very deserving local high school student that will be attending Sacramento State and pursuing a career engineering. The brief bios on her and the other future leaders were very impressive. You can read more about the event in an article by CREATE Mentor Erik Fanselau later in this newsletter.

Mark February 8 on your calendars for our annual membership meeting at which we honor Past Presidents of the Sierra Chapter. We will have the current ACEC California President, Raul Laborin, joining us to provide updates from the State.

I look forward to seeing you in 2023. In the meantime, enjoy the holidays!

**Tom Sell**  
 Sierra Chapter President  
 2022-2023

## November Meeting Recap—David Ericksen, Partner at Collins + Collins and Moya Henderson, Vice President at Assured Partners.

*By Chad Coleman, Director*

The November 2022 meeting speaker was David Ericksen, Partner at Collins + Collins focused on Construction, Professional Liability, Environmental, and Real Estate practices. Mr. Ericksen was joined by Moya Henderson, Vice President at Assured Partners who provides a full line of professional liability and business insurance to the professional engineering sector.

David presented several case studies of projects that went well and some that did not from a professional liability perspective. A few lessons learned by the attendees include the following.

Management of change during projects is a key responsibility of Project Managers and Principals.

This often includes:

- Thoroughly planning the project before beginning.
  - This often include client selection, project selection, team selection, scope for success, risk assessment vs. economic/strategic benefits, etc.
- Understanding that the project we live with is often not the project we planned.
  - Attempt to contain change by contract. This may include definitions of the client/consultant relationship, defining roles on the project including assignment of risks in case the client reduces scope mid-project, and defining responsibilities for risk in cases where changes and substitutions are made during construction.

- Proactively identifying, managing, and leading change throughout the project.
  - Typical flags for change often include: unforeseen site conditions, contractor performance issues, weather, codes & regulations, requests for substitutions during construction, change in key team members mid-project.
- Sometimes, changes proposed by others must be rejected in the name of risk management.

David suggested the acronym IROPE as a tool for managing changes throughout a project lifecycle.

- Issue – identify the issue with a potential to be a project or business risk.
- Risks – identify the risks that arise from the issue.
- Options – inventory the options for addressing the issue and mitigating the risk.
- Plan – determine the best course of action and clearly communicate to all parties how the change is to be managed. Be certain to communicate internally so that our own people are well-aware of changed conditions and new expectations.

The presentation was an excellent opportunity to reflect on good business practices and identify internal changes that we may want to consider so that our teams identify and avoid unnecessary risk for our firms and for our clients.

## City of Elk Grove Mayor Bobbie Singh-Allen to Address the Joint APWA-ACEC Lunch Meeting on January 6<sup>th</sup>

By Marco Palilla, Director

**Bobbie Singh-Allen**  
City of Elk Grove Mayor

Our annual joint meeting with the Sacramento Chapter of APWA is Friday, January 6<sup>th</sup> and always draws a big crowd. This year's event will be a luncheon held at the Dante Club in Sacramento. The luncheon will feature Bobbie Singh-Allen, Mayor of the City of Elk Grove. With a population projected to exceed

220,000 within the next decade, Mayor Singh-Allen and other Elk Grove leaders are acting now to create a vibrant and sustainable city with innovative spaces to live, work and play. Learn more about the projects, programs, people, and possibilities imagined for Sacramento County's second largest city.

Bobbie Singh-Allen was elected Mayor of the City of Elk Grove, CA in November 2020 and reelected to her second term in November 2022. Mayor Singh-Allen draws upon her experience as a resident of Elk Grove for more than 30 years, a former school board member, an immigrant from India, a wife, parent, and a career professional representing statewide associations and communities to advo-

cate for quality-of-life amenities, services, and programs at the local, state, and national levels. Her civic and community engagement has earned her several awards and recognitions.

Join ACEC and APWA members on Friday, January 6<sup>th</sup> to hear Mayor Bobbie Singh-Allen discuss future plans for Elk Grove!

One Sierra Chapter member firm is invited to sponsor the event for \$250, on a first-come-first-served basis. The sponsorship includes two seats at the table with Mayor Bobbie Singh-Allen and an opportunity to take a couple of minutes to promote your firm to the audience. If you're interested in this sponsorship, please reach out to Lisa Thut of APWA ([Lisa.Thut@ghd.com](mailto:Lisa.Thut@ghd.com)).

Register at this link: <https://sacramento.apwa.net/EventDetails/30402>

- Where:** Dante Club, 2330 Fair Oaks Blvd, Sacramento, CA 95825
- When:** Friday, January 6, 2023, doors open at 11:45am.
- Cost:** \$35 Early Bird - APWA and ACEC members only until 12/28. (\$45 non-members)
- \$45 for APWA and ACEC members registering after 12/28. (\$55 for non-members)

## Mentoring our Future Professionals

By Erik Fanselau, Vice President

The Sierra Chapter was pleased to support the CREATE program for the second year in a row. The CREATE (Construction, Re-Development, Engineering, architecture, Trades, Education) program is run by the Construction Industry Education Foundation in partnership with the Sacramento Regional Builders Exchange.

The goal of CREATE is to “*educate and inspire stu-*

contractors. I also gave a brief presentation to the class on what I do as a civil engineer and discussed several of my past projects.

The project this semester was to use a set of typical 40-foot-long steel shipping containers to build a new business. The project included site design, drainage and water quality, parking layout, utilities, landscaping, ADA requirements, sketches, calculations, RFIs, and cost estimating. We met with the students weekly and provided guidance on the planning and design process. Students also visited an active construction site at a local high school. The field trip to the job site was a highlight and I believe all of the students enjoyed the opportunity to put on a hard hat and safety vest for the first time. The project culminated in a presentation and competition with groups from other schools at Sacramento State on December 6<sup>th</sup>.

For the second consecutive year, the ACEC-CA Sierra Chapter provided support to CREATE students with a chapter-sponsored scholarship. At the 2022 CREATE awards luncheon, Sierra Chapter President, Tom Sell, awarded a \$2,000 check to scholarship winner Yuliana Khoronzhak. Yuliana is a senior at Rosemont High School and intends to pursue a degree in engineering at Sacramento State. She has participated in Rosemont’s Engineering Construction Design program for the past three years and has a nearly 4.3 GPA. Yuliana came to the United States from Ukraine when she was only 8 years old and loves math and physics. CREATE is a great way we professionals can support our future members and give back to those that have taken the time to teach and mentor each one of us.

**Tom Sell presents the ACEC Scholarship check to Rosemont High School student, Yuliana Koronzhak**

*ents to pursue pathways which create the built environment.”* This program includes over 75 high schools all over California and over 10,000 students have participated since its inception. The program pairs mentors from the design and construction industry with high school junior and senior students to complete a semester long project that includes planning and design. Last year I served as a CREATE mentor at Whitney High School in Rocklin. This year I was assigned to a class at Granite Bay High School that included 29 students. Among our team of mentors, I was the only civil engineer and was joined by other industry professionals such as structural engineers, mechanical contractors, and site

## ACEC Scholarship Applications Due by January 27, 2023!

By Marco Palilla, Director

Every year, the ACEC California Scholarship Foundation seeks the best and brightest engineering and land surveying students in California and awards scholarships to them. Over the years, ACEC California has awarded over \$700,000 in cash grants to hundreds of outstanding students.

The ACEC California Scholarship Awards are funded through generous donations from ACEC California Chapters, member firms, principals and employees. Donations to the Scholarship Foundation, a public non-profit benefit corporation, are tax deductible. Every dollar goes directly to the student – no money is used for overhead or administrative costs. The ACEC California Scholarship Foundation is administered through the generous volunteer work of

ACEC Chapter members.

ACEC California will be awarding up to \$60,000 in scholarships for qualified engineering and land surveying students throughout California for the 2023-2024 academic year ranging from \$1,000 to \$10,000 each. Sierra Chapter members serve as liaisons with local colleges and universities to distribute applications and promote the scholarships. I send information to Sac State and UOP while Rosa Griggs takes care of UC Davis.

ACEC-CA will be accepting applications until 5:00pm on January 27, 2023. The scholarship application is available at this link:

<https://www.acec-ca.org/general/custom.asp?page=ScholarshipApplication>

and was e-mailed to college Engineering Departments throughout California.

If you know a student who is eligible for this year's scholarship, please pass this information on to them.

## Past President's and Tim Fleming Memorial Scholarship Dinner SAVE THE DATE!

By: Marco Palilla, Past President

Please mark your 2023 calendars now for our Past President's and Tim Fleming Memorial Scholarship Dinner to be held on Wednesday, February 8<sup>th</sup>. Yes, this is a week earlier than usual because we needed to accommodate the ACEC Engineering Excellence Awards Banquet being held on February 15<sup>th</sup> in Orange County. More details to follow.....

**Wednesday, February 8, 2023**

## ACEC Sierra Chapter Firm Profile

UNICO Engineering, Inc. (UNICO) is a certified SBE and DBE firm fully committed to providing high quality construction management, systems integration, and land surveying services to public and private clients throughout California. With a spirit of cooperation and partnering, UNICO focuses on responsiveness, delivering value services, and meeting client needs.

### Land Surveying

- Topographic Mapping
- ALTA Surveys

California

# SCHOLARSHIPS

## FOR ENGINEERING & LAND SURVEYING STUDENTS

Every year, ACEC California's Scholarship Foundation awards scholarships ranging from \$1,000 to \$10,000 each to deserving college students working toward a degree in engineering and/or land surveying. The top award recipient is nominated to apply for the ACEC National scholarship competition. For this scholarship year, we plan to give up to \$60,000 in scholarships to students!

Scholarship application packets are posted on our website and are also emailed to college Engineering Departments throughout California.

\*Requirements:

1. Be entering your junior, senior, fifth or master's degree year in the Fall of the year you are applying.
2. Upper division undergraduate students must be enrolled full-time and working toward a degree in an engineering or land-surveying curriculum approved by the Accreditation Board for Engineering and Technology (ABET).
3. Master's degree students must be enrolled at least half-time, and either be in an ABET-accredited Master of Science (MS) engineering program or have a Bachelor of Science (MS) degree from an ABET-accredited engineering program.
4. Applicants must have a minimum grade point average of 3.2 in completed engineering and land surveying courses and a minimum overall grade point average of 3.0 on a scale of 4.0.

**WILL AWARD UP TO**  
**\$60,000 in Scholarships**

For more information and for all requirements, visit: [www.acec-ca.org](http://www.acec-ca.org)

# UPCOMING EVENTS

All proceeds benefit the ACEC California Scholarship Foundation.

Every year, the ACEC California Scholarship Foundation seeks **the best and brightest engineering and land surveying students in California** and awards scholarships to them. Over the years, ACEC California has awarded **over \$800,000 in cash grants** to hundreds of outstanding students.

Your donation to the Foundation is an important investment in the future of the engineering and land surveying professions. Helping today's top students become tomorrow's best engineers is crucial to our industry. As the cost of education continues to spiral upward, it is more important than ever that we lend a hand to those deserving young men and women. By donating to the Foundation, you will help attract and retain the most talented students to the professional engineering and land surveying professions.

With your support, students aspiring to be the next generation of engineers and land surveyors will continue on their path towards entering the workforce knowing that the industry is already actively supporting their success.

## RISING COST OF HIGHER EDUCATION

According to the Public Policy Institute of California, the cost of attending a four-year university in California is at an all-time high. Both the University of California and the California State University systems doubled their average tuition and mandatory fees during the last ten years. In total, both institutions more than tripled tuition and fees since the 2000-2001 academic year.

The rising cost of higher education has made financial aid and scholarship opportunities that much more valuable to students – especially those who are seeking to enter a workforce that also requires a graduate degree.

## DONATIONS

The ACEC California Scholarship Awards are funded through generous donations from ACEC California Chapters, member firms, principals, and employees. While these donations are deeply appreciated, the ACEC Scholarship Foundation is also endeavoring to expand its support network and is hoping to reach individuals and organizations interested in supporting engineering and land surveying students.

Donations to the Scholarship Foundation, a public non-profit benefit corporation, are tax deductible. Every dollar goes directly to the student – no money is used for overhead or administrative costs. The ACEC California Scholarship Foundation is administered through the generous volunteer work of ACEC California Chapter members. Names of individuals and firms who donate to the Scholarship Foundation will be recognized in ACEC California's monthly newsletter.
